Every discipline has its own conventions to be followed when writing a research paper and the physical sciences are no different. Of course, using words effectively is always of crucial importance, but during my work as a researcher and an academic editor, I have come to identify some recurrent errors in research papers that are more commonly found in the physical sciences than in other fields.

5 mistakes to avoid in a physical sciences research paper ...

Thanks Donna--I find topics by looking at recent science research. There are so many new discoveries being made all the time! In fact, since all of my topics are taken from recent articles and research, that makes it easier for students to find sources if they need to use them in the paper. I probably need to add that in the article.
